HACKATHON IN DISTRIBUTED CORPORATE SECURITY

25-26 March at CEVUG/OSL (University of Granada, Spain)

If you want to participate in an **European Project** and see how a **real corporate security system** works, join us!

PROPOSED PROJECTS (TO BE CHOSEN):

- **Server performance upgrade** of the corporate security system MUSES (Sweden Connectivity AB)
- **MUSES server web based user interface** (Sweden Connectivity AB + S2 Grupo + UGR)
- **Command signature and verification** component (S2 Grupo)
- **Android public key data encryption** component (S2 Grupo)
- **Data Mining applied to security-based data**: Analysis and Visualization tools (GeNeura Research Group – UGR)

If you cannot come to Granada, you can attend and participate remotely via GitHub!
